Adobe Acrobat is a commercial desktop-based document viewer and editor, and a commercial desktop-based presentation, forms, and database creation, conversion, and distribution program. Developed and marketed by Adobe Systems, Acrobat was first released in 1996 as a standalone app. Before the introduction of Acrobat, most software-based PDF-making tools ran on standalone mainframe computers or minicomputers, with each PDF user manually laying out text and graphics. Adobe's Acrobat and Adobe Reader became widely used, and Adobe's Acrobat Reader is still the most widely used PDF reader in the world. Acrobat is available as a stand-alone desktop app, as a standalone web app, as a web app embedded within other desktop apps, as a mobile app, and as a desktop app bundled with Adobe Creative Suite. Adobe Acrobat is a product line consisting of Acrobat Standard, Acrobat Pro, Acrobat Pro DC, Acrobat Essentials, Acrobat Pro Extended, Acrobat Pro Extended for the Mac, Acrobat Reader DC, Acrobat Reader X, Acrobat Reader XI, Acrobat Reader 12, Acrobat Reader 13, Acrobat Reader 14, Acrobat Reader DC for iPad, Acrobat Reader DC for Android, Acrobat Reader DC for iOS, Acrobat Reader DC for macOS, and Acrobat DC. AutoCAD and Acrobat are the largest standalone commercial desktop and mobile apps sold by Autodesk and Adobe Systems, respectively. Most others can be grouped in three categories: CAD, e-books, and PDF. CAD (computer-aided design) Among the most popular and widely used CAD programs are Microsoft Visio and StarDraw (also known as Aldus Freehand). Vis

I need to get value by key in object that is inside another object. I am using es6 but I do not know how to get value by nested object key. Can you please help me? const obj = { "name": "mary", "room": "room1" } A: You can map the object by using Object.entries(obj). Then, simply loop through the entries and get the room value using the entry[1]. const obj = { "name": "mary", "room": "room1" } const result = Object.entries(obj).map(([key, value]) => key) console.log(result) Today, East Asia is the fastest-growing market for digital payment technologies, with global companies like PayPal, Alipay, Tencent, and Chinese banks building a healthy ecosystem for peer-to-peer payments. However, one of the main obstacles to that growth is the lack of a reliable infrastructure for cross-border P2P payments. Despite new technologies such as blockchain and biometrics, the fact is, that money will always move through the traditional, regulated, correspondent

banking system. While this has served us well over the years, it is beginning to show its age. Toward a New Global Standard Instead of building a new system, an opportunity is being missed in that many of the existing payment systems simply don't a1d647c40b
