**Casino bonuses come in all shapes and sizes. It is rather difficult to determine their numerical value. The most important thing to do when having a clear idea of how much money you are getting is to understand what it requires to withdraw the bonus funds. In the majority of cases, you will have to wager a number of times all the money in your bonus in order to be eligible for withdrawal. If it happens that you don't meet this condition, you will first have to wait a certain period of time before you can put the bonus money into action. Keep in mind that most will not let you do it if you owe another third of your playing period. Once all the requirements are met, you can withdraw the bonus money without any restrictions. That's why it is so important to play with and check the odds before choosing a game. If the percentage is not favourable and it seems that a game is not worth playing, it's the end of both an exciting session and a big win. Bonus Requirements Summary The example is clear enough. So, now, let's sum up all the conditions in one sentence: - Bonus funds can be withdrawn if they are converted into cash - If your bonus is not converted into real money, you'll have to play the specified games for a certain period In reality, everything occurs in the opposite order. Before you get your bonus, you will be**

**required to complete a lot of unrelated tasks. If you have enough time, you can accomplish them without interruptions and it will allow you to keep a bonus. This will be well and good, unless you meet other conditions that will force you to put your bonus money into action. Keep in mind that if you do not meet any of the requirements, your bankroll will be lost forever. So, what are the bonuses conditions? For each casino bonus, you will have to meet some or all of the wagering requirements before a cash reward can be claimed. The requirements vary between casino bonuses and may depend on the stakes of the game as well as the type of the game. You can consider, for example, that in roulette a bet of \$10000 will present you a higher requirement than a bet of \$500 or even \$100. Wagering requirements also relate to the bonus type. There is usually a minimum wagering requirement for wagers depending on where you have put your money. We will discuss these requirements in more detail further. How to Earn Cash? Another aspect of the casino bonus**
